## CATEGORICAL EXCLUSION

*Chevron Pipeline Renewal*  
**DOI-BLM-CO-N05-2015-0066-CX**

### Identifying Information

**Project Title:** Chevron Pipeline Renewal

**Legal Description:** Sixth Principal Meridian,

T. 2N., R.102W.,

sec. 31, SW $\frac{1}{4}$ NE $\frac{1}{4}$ ;

T. 2N., R.103W.,

sec. 7, Lots 1 & 2, SW $\frac{1}{4}$ NE $\frac{1}{4}$ , SE $\frac{1}{4}$ NW $\frac{1}{4}$ , N $\frac{1}{2}$ SE $\frac{1}{4}$ ;

sec. 8, W $\frac{1}{2}$ SW $\frac{1}{4}$ , SE $\frac{1}{4}$ SW $\frac{1}{4}$ ;

sec. 16, SW $\frac{1}{4}$ NW $\frac{1}{4}$ , N $\frac{1}{2}$ SW $\frac{1}{4}$ , W $\frac{1}{2}$ SE $\frac{1}{4}$ , SE $\frac{1}{4}$ SE $\frac{1}{4}$ ;

sec. 17, N $\frac{1}{2}$ NE $\frac{1}{4}$ , SE $\frac{1}{4}$ NE $\frac{1}{4}$ , NE $\frac{1}{4}$ NW $\frac{1}{4}$ ;

sec. 21, NE $\frac{1}{4}$ NE $\frac{1}{4}$ ;

sec. 22, SW $\frac{1}{4}$ NE $\frac{1}{4}$ , N $\frac{1}{2}$ NW $\frac{1}{4}$ , SE $\frac{1}{4}$ NW $\frac{1}{4}$ , N $\frac{1}{2}$ SE $\frac{1}{4}$ , SE $\frac{1}{4}$ SE $\frac{1}{4}$ ;

sec., 23, NW $\frac{1}{4}$ SW $\frac{1}{4}$ , S $\frac{1}{2}$ SW $\frac{1}{4}$ ;

T. 2N., R.104W.,

sec. 1, N $\frac{1}{2}$ SW $\frac{1}{4}$ , SE $\frac{1}{4}$ SW $\frac{1}{4}$ , SW $\frac{1}{4}$ SE $\frac{1}{4}$ ;

sec. 2, Lots 2-4, S $\frac{1}{2}$ NE $\frac{1}{4}$ ;

sec. 12, N $\frac{1}{2}$ NE $\frac{1}{4}$ ;

T. 3N., R. 104W.,

sec. 34, Lots 3-4;

sec. 35, SW $\frac{1}{4}$ SW $\frac{1}{4}$ ,

Rio Blanco County, Colorado.

**Applicant:** Chevron Pipe Line Company

**Casefile:** COC37784

### Conformance with the Land Use Plan

The Proposed Action is subject to and is in conformance (43 CFR 1610.5) with the following land use plan:

**Land Use Plan:** White River Record of Decision and Approved Resource Management Plan (ROD/RMP), as amended by the White River Field Office Oil and Gas Development Approved Resource Management Plan Amendment (ROD/RMPA)

**Date Approved:** July 1997, amended August 2015

**Decision Language:** “Make federal oil and gas resources available for leasing and development in a manner that provides reasonable protection for other resource values.” (ROD/RMPA, page 2-34)

“Manage BLM public lands, including the siting of public and private facilities through the issuance of applicable land use authorizations, in a manner that balances the needs of oil and gas development with the management for other resource values. (ROD/RMPA, page 2-39)

Respond to internal and external requests for land use authorizations (e.g., pipelines, access routes, utility lines, communication sites, leases, and permits). (ROD/RMPA, page 2-39)

Emphasize efficient use of and colocation with existing ROWs to protect resources and resource uses. Consider the establishment of new ROW corridors to meet demand for oil and gas activities.” (ROD/RMPA, page 2-39)

## **Proposed Action**

### ***Project Components and General Schedule***

Chevron Pipe Line Company (Chevron) submitted an application for the renewal of right-of-way (ROW) grant COC37784 for a CO<sub>2</sub> pipeline. This grant was issued to Chevron U.S.A. Inc. on May 29, 1985 and authorized a 16 inch buried CO<sub>2</sub> pipeline with associated aboveground facilities and cathodic protection facilities to be located within a permanent ROW. The entirety of this line runs from Rock Springs, Wyoming through Utah to Rangely, Colorado. The portion in Colorado is authorized by COC37784 and is 42,279 feet, more or less, in length and 50 feet in width, containing 48.5 acres on BLM lands. This ROW was assigned to Chevron Pipe Line Company on February 20, 2004. On May 28, 2015, ROW COC37784 expired, and this proposal is to renew the grant for 30 years.

### ***BLM Required Terms and Conditions to Mitigate Impacts to Cultural and Paleontological Resources***

1. The applicant is responsible for informing all persons who are associated with the project that they will be subject to prosecution for knowingly disturbing archaeological sites or for collecting artifacts.
2. If any archaeological materials are discovered as a result of operations under this authorization, activity in the vicinity of the discovery will cease, and the BLM WRFO Archaeologist will be notified immediately. Work may not resume at that location until approved by the AO. The applicant will make every effort to protect the site from further impacts including looting, erosion, or other human or natural damage until BLM determines a treatment approach, and the treatment is completed. Unless previously determined in treatment plans or agreements, BLM will evaluate the cultural resources and, in consultation with the State Historic Preservation Office (SHPO), select the

appropriate mitigation option within 48 hours of the discovery. The applicant, under guidance of the BLM, will implement the mitigation in a timely manner. The process will be fully documented in reports, site forms, maps, drawings, and photographs. The BLM will forward documentation to the SHPO for review and concurrence.

3. Pursuant to 43 CFR 10.4(g), the applicant must notify the AO, by telephone and written confirmation, immediately upon the discovery of human remains, funerary items, sacred objects, or objects of cultural patrimony. Further, pursuant to 43 CFR 10.4(c) and (d), the operator must stop activities in the vicinity of the discovery and protect it for 30 days or until notified to proceed by the AO.
4. The applicant is responsible for informing all persons who are associated with the project operations that they will be subject to prosecution for disturbing or collecting vertebrate or other scientifically-important fossils, collecting large amounts of petrified wood (over 25lbs./day, up to 250lbs./year), or collecting fossils for commercial purposes on public lands.
5. If any paleontological resources are discovered as a result of operations under this authorization, the applicant or any of his agents must stop work immediately at that site, immediately contact the BLM Paleontology Coordinator, and make every effort to protect the site from further impacts, including looting, erosion, or other human or natural damage. Work may not resume at that location until approved by the AO. The BLM or designated paleontologist will evaluate the discovery and take action to protect or remove the resource within 10 working days. Within 10 days, the operator will be allowed to continue construction through the site, or will be given the choice of either (a) following the Paleontology Coordinator's instructions for stabilizing the fossil resource in place and avoiding further disturbance to the fossil resource, or (b) following the Paleontology Coordinator's instructions for mitigating impacts to the fossil resource prior to continuing construction through the project area.

## Categorical Exclusion Review

The Proposed Action qualifies as a categorical exclusion under 516 DM 11.9, E9: *"Renewals and assignments of leases, permits, or rights-of-way where no additional rights are conveyed beyond those granted by the original authorizations."*

The Proposed Action has been reviewed with the list of extraordinary circumstances (43 CFR 46.215) described in the table below.

Extraordinary Circumstance	YES	NO
a) Have significant adverse effects on public health and safety.		x
b) Have significant impacts on such natural resources and unique geographic characteristics as historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands; floodplains; national monuments; migratory birds; and other ecologically significant or critical areas.		x

Extraordinary Circumstance	YES	NO
c) Have highly controversial environmental effects or involve unresolved conflicts concerning alternative uses of available resources.		X
d) Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental risks.		X
e) Establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.		X
f) Have a direct relationship to other actions with individually insignificant but cumulatively significant environmental effects.		X
g) Have significant impacts on properties listed, or eligible for listing, in the National Register of Historic Places as determined by the bureau.		X
h) Have significant impacts on species listed, or proposed to be listed, on the List of Endangered or Threatened Species, or have adverse effects on designated Critical Habitat for these species.		X
i) Violate a Federal law, or a State, local or tribal law or requirement imposed for the protection of the environment.		X
j) Have a disproportionately high and adverse effect on low income or minority populations.		X
k) Limit access to and ceremonial use of Indian sacred sites on Federal lands by Indian religious practitioners or significantly affect the physical integrity of such sacred sites.		X
l) Contribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive species known to occur in the area or actions that may promote the introduction, growth, or expansion of the range of such species.		X

## Interdisciplinary Review

The Proposed Action was presented to, and reviewed by, the White River Field Office interdisciplinary team on 6/16/2015. A complete list of resource specialists who participated in this review is available upon request from the White River Field Office. The table below lists resource specialists who provided additional review or remarks concerning cultural resources and special status species.

Name	Title	Resource	Date
Michael Selle	Archaeologist	Cultural Resources, Native American Religious Concerns	6/23/2015
Ed Hollowed	Wildlife Biologist	Special Status Wildlife Species	8/11/2015
Heather Woodruff	Ecologist	Special Status Plant Species	6/17/2015
Keesha Cary	Realty Specialist	Project Lead	9/2/2015
Heather Sauls	Planning and Environmental Coordinator	NEPA Compliance	9/17/2015

**Cultural Resources:** The pipeline route was inventoried at the Class III (100 percent pedestrian) level in 1984 and reported in 1985 (Woodward-Clyde 1985 compliance dated 6/1/1985). The report identified a number of Isolated Finds (IFs) and sites, 5RB.2685, 5RB.2686, and 5RB.2687. Required mitigation for the sites was completed in 1986 (Tucker 1986, compliance dated 6/1986) and all needed consultation with the Colorado State Historic

Preservation Office (SHPO) was completed that year. Renewal of the ROW would not have any new impacts on known cultural resources along the pipeline route.

**Native American Religious Concerns:** No Native American Religious Concerns are known in the area, and none have been noted by Tribal authorities. Should recommended inventories or future consultations with Tribal authorities reveal the existence of such sensitive properties, appropriate mitigation and/or protection measures may be undertaken.

**Threatened and Endangered Wildlife Species:** The existing pipeline corridor passes through about 2.5 miles of white-tailed prairie dog habitat (currently or formerly occupied) along Raven Ridge and Coal Oil Basin (Rangely Oil Field) that has limited potential (e.g., proximity to roads, small, discontinuous towns) to support individuals of a reintroduced population of black-footed ferret as well as nesting burrowing owl, though there is no documentation of either species in these particular areas. About 2.7 miles of the ROW crosses greater sage-grouse general habitat. Roughly half of this corridor lies on the extreme periphery of suitable sagebrush habitat that abuts pinyon-juniper woodlands and is of limited utility for grouse. Approximately 1.3 miles of the corridor extending east of the Colorado-Utah state line parallels an unbroken 120-foot wide corridor where previous ROW clearing operations (i.e., parallel ROWs) have interrupted continuous sagebrush canopies. Although this area supported an active lek through at least 1989, these ranges may now be uninhabited during the nesting season. The corridor also passes within 1/4 mile of an historic ferruginous hawk nest complex and is composed of saltbush and sagebrush habitat largely suited along its entire length for nesting by BLM-sensitive Brewer's sparrow and FWS Birds of Conservation Concern sage sparrow, sage thrasher, and loggerhead shrike. Beyond its initial installation, the distribution and abundance of affected wildlife has presumably stabilized and continued function of this pipeline would have no further influence on the populations or habitats of any of these species.

Maintenance operations that clear redeveloped shrub canopies from the pipeline corridor (an expected outcome of reclamation) not only remove shrub nest substrate for the birds listed above, but tends to render bisected stands of shrubs less suited for bird nesting or secure movements for decades prior to shrub redevelopment. This concept is relevant to sage-grouse in this circumstance from the perspective of species recovery and reoccupation of former sagebrush shrublands. Shrub clearing operations conducted during the migratory bird nesting season (core season from May 1 to 30 June 30) would destroy nests with eggs or young on affected portions of the ROW and would risk disrupting nesting activities taking place in close proximity to equipment operation sufficient to cause mortality of eggs or nestlings (e.g., prolonged or inopportune absence of incubating or brooding adults). Similarly, clearing operations conducted in close proximity to occupied raptor nests, including ferruginous hawks and burrowing owls, risk disruption of nest activity that takes place as early as February 1 and continues through August 15.

**Threatened and Endangered Plant Species:** The renewal of the pipeline does not involve any ground disturbance and should not result in any impacts to special status plant species. There are no special status plant species issues or concerns associated with the Proposed Action.

**Mitigation**

1. All applicable terms, conditions, and stipulations contained in the original ROW grant and any amendments shall be carried forward and remain in full force and effect. No new construction is authorized.
2. At least 90 days prior to termination of the right-of-way, the holder shall contact the Authorized Officer to arrange a joint inspection of the right-of-way. The inspection will result in the development of an acceptable termination and rehabilitation plan submitted by the holder. This plan shall include, but is not limited to, removal of facilities, drainage structures, and surface material; recontouring; topsoiling; or seeding. The Authorized Officer must approve the plan in writing prior to the holder's commencement of any termination activities.
3. The holder shall conduct all activities associated with the construction, operation and termination of the right-of-way within the authorized limits of the right-of-way.
4. Any proposal involving additional surface disturbance outside of the existing right-of-way disturbance requires an application to the BLM for analysis and authorization. New stipulations for construction would be applied to projects subject to the regulations and policies existing at the time of authorization.
5. The holder shall monitor all disturbed and reclaimed areas through final abandonment for the presence of invasive, non-native, and/or noxious plant species. The holder will be responsible for eradication of noxious weeds that occur on site using materials and methods approved in advance by the Authorized Officer.
6. The holder shall notify the authorized officer at least 60 days prior to non-emergency activities that would cause surface disturbance in the right-of-way. A "Notice to Proceed" shall be required prior to any non-emergency activities that would cause surface disturbance on the right-of-way. Any request for a "Notice to Proceed" must be made to the authorized officer, who will review the Proposed Action for consistency with resource management concerns such as wildlife, big game winter range, paleontology, special status species, and cultural resource protection. The authorized

officer may require the completion of special status species surveys or other resource surveys. Additional measures may be required to protect special status species or other resources.

7. Shrubland clearing operations are prohibited from May 1 through June 30 to reduce destruction and adverse disruption of nesting migratory birds.
8. Shrubland clearing operations are prohibited from taking place within 1 mile of ferruginous hawk nest sites and within 0.25 mile of burrowing owl nest burrows from February 1 until August 15 unless timely nest surveys, conducted consistent with most current WRFO protocols, demonstrate that habitat and historic nest sites are unoccupied. Survey protocols must be approved by the WRFO Authorized Officer in advance of their conduct. Timeframes and buffer distances may be modified by the WRFO Authorized Officer according to site-specific circumstances (e.g., species involved, line-of-sight, weather, and nest phenology considerations). These conditions apply to the following land base, at a minimum:

Township 2 North, Range 102 West  
Section 31: SWNE.

Township 2 North, Range 103 West  
Section 7: Lot 1, 2 (~W2NW), SENW;  
Section 22: E2NW, SWNE, N2SE;  
Section 23: SWSW.

Township 2 North, Range 104 West  
Section 1: SW, SWSE;  
Section 2: Lots 2-4 (~NWNE, W2NW), S2NE;  
Section 12: N2NE.

9. Shrubland clearing operations are prohibited in the following legal subdivisions in order to retain desirable redeveloped sagebrush canopies in habitat suitable for reoccupation by greater sage-grouse:

Township 3 North, Range 104 West  
Sections 34 and 35

Township 2 North, Range 104 West  
Section 2

## **Tribes, Individuals, Organizations, or Agencies Consulted**

Colorado SHPO 1985 and 1986.

## **Compliance with NEPA**

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM 11.9, E9. This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances

potentially having effects that may significantly affect the environment. The Proposed Action has been reviewed, and none of the extraordinary circumstances described in 43 CFR 46.215 apply.

## **DECISION RECORD**

***Chevron Pipeline Renewal***  
**DOI-BLM-CO-N05-2015-0066-CX**

### **Decision**

It is my decision to implement the Proposed Action as described in DOI-BLM-CO-N05-2015-0066-CX, renewing the Chevron Pipe Line Company grant COC37784 for a 30-year term.

### ***Terms and Conditions***

1. The applicant is responsible for informing all persons who are associated with the project that they will be subject to prosecution for knowingly disturbing archaeological sites or for collecting artifacts.
2. If any archaeological materials are discovered as a result of operations under this authorization, activity in the vicinity of the discovery will cease, and the BLM WRFO Archaeologist will be notified immediately. Work may not resume at that location until approved by the AO. The applicant will make every effort to protect the site from further impacts including looting, erosion, or other human or natural damage until BLM determines a treatment approach, and the treatment is completed. Unless previously determined in treatment plans or agreements, BLM will evaluate the cultural resources and, in consultation with the State Historic Preservation Office (SHPO), select the appropriate mitigation option within 48 hours of the discovery. The applicant, under guidance of the BLM, will implement the mitigation in a timely manner. The process will be fully documented in reports, site forms, maps, drawings, and photographs. The BLM will forward documentation to the SHPO for review and concurrence.
3. Pursuant to 43 CFR 10.4(g), the applicant must notify the AO, by telephone and written confirmation, immediately upon the discovery of human remains, funerary items, sacred objects, or objects of cultural patrimony. Further, pursuant to 43 CFR 10.4(c) and (d), the operator must stop activities in the vicinity of the discovery and protect it for 30 days or until notified to proceed by the AO.
4. The applicant is responsible for informing all persons who are associated with the project operations that they will be subject to prosecution for disturbing or collecting vertebrate or other scientifically-important fossils, collecting large amounts of petrified wood (over

25lbs./day, up to 250lbs./year), or collecting fossils for commercial purposes on public lands.

5. If any paleontological resources are discovered as a result of operations under this authorization, the applicant or any of his agents must stop work immediately at that site, immediately contact the BLM Paleontology Coordinator, and make every effort to protect the site from further impacts, including looting, erosion, or other human or natural damage. Work may not resume at that location until approved by the AO. The BLM or designated paleontologist will evaluate the discovery and take action to protect or remove the resource within 10 working days. Within 10 days, the operator will be allowed to continue construction through the site, or will be given the choice of either (a) following the Paleontology Coordinator's instructions for stabilizing the fossil resource in place and avoiding further disturbance to the fossil resource, or (b) following the Paleontology Coordinator's instructions for mitigating impacts to the fossil resource prior to continuing construction through the project area.
6. All applicable terms, conditions, and stipulations contained in the original ROW grant and any amendments shall be carried forward and remain in full force and effect. No new construction is authorized.
7. At least 90 days prior to termination of the right-of-way, the holder shall contact the Authorized Officer to arrange a joint inspection of the right-of-way. The inspection will result in the development of an acceptable termination and rehabilitation plan submitted by the holder. This plan shall include, but is not limited to, removal of facilities, drainage structures, and surface material; recontouring; topsoiling; or seeding. The Authorized Officer must approve the plan in writing prior to the holder's commencement of any termination activities.
8. The holder shall conduct all activities associated with the construction, operation and termination of the right-of-way within the authorized limits of the right-of-way.
9. Any proposal involving additional surface disturbance outside of the existing right-of-way disturbance requires an application to the BLM for analysis and authorization. New stipulations for construction would be applied to projects subject to the regulations and policies existing at the time of authorization.
10. The holder shall monitor all disturbed and reclaimed areas through final abandonment for the presence of invasive, non-native, and/or noxious plant species. The holder will be responsible for eradication of noxious weeds that occur on site using materials and methods approved in advance by the Authorized Officer.
11. The holder shall notify the authorized officer at least 60 days prior to non-emergency activities that would cause surface disturbance in the right-of-way. A "Notice to Proceed" shall be required prior to any non-emergency activities that would cause surface disturbance on the right-of-way. Any request for a "Notice to Proceed" must be made to the authorized officer, who will review the Proposed Action for consistency with

resource management concerns such as wildlife, big game winter range, paleontology, special status species, and cultural resource protection. The authorized officer may require the completion of special status species surveys or other resource surveys. Additional measures may be required to protect special status species or other resources.

12. Shrubland clearing operations are prohibited from May 1 through June 30 to reduce destruction and adverse disruption of nesting migratory birds.
13. Shrubland clearing operations are prohibited from taking place within 1 mile of ferruginous hawk nest sites and within 0.25 mile of burrowing owl nest burrows from February 1 until August 15 unless timely nest surveys, conducted consistent with most current WRFO protocols, demonstrate that habitat and historic nest sites are unoccupied. Survey protocols must be approved by the WRFO Authorized Officer in advance of their conduct. Timeframes and buffer distances may be modified by the WRFO Authorized Officer according to site-specific circumstances (e.g., species involved, line-of-sight, weather, and nest phenology considerations). These conditions apply to the following land base, at a minimum:

Township 2 North, Range 102 West  
Section 31: SWNE.

Township 2 North, Range 103 West  
Section 7: Lot 1, 2 (~W2NW), SENW;  
Section 22: E2NW, SWNE, N2SE;  
Section 23: SWSW.

Township 2 North, Range 104 West  
Section 1: SW, SWSE;  
Section 2: Lots 2-4 (~NWNE, W2NW), S2NE;  
Section 12: N2NE.

14. Shrubland clearing operations are prohibited in the following legal subdivisions in order to retain desirable redeveloped sagebrush canopies in habitat suitable for reoccupation by greater sage-grouse:

Township 3 North, Range 104 West  
Sections 34 and 35

Township 2 North, Range 104 West  
Section 2

### **Compliance with Laws & Conformance with the Land Use Plan**

This decision is in compliance with the Endangered Species Act and the National Historic Preservation Act. It is also in conformance with the 1997 White River Record of Decision and Approved Resource Management Plan (ROD/RMP), as amended by the White River Field Office Oil and Gas Development Approved Resource Management Plan Amendment (ROD/RMPA).

## Public Involvement

This project was posted on the WRFO's on-line National Environmental Policy Act (NEPA) register on 6/17/2015. No comments or inquiries have been received.

## Rationale

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM 11.9, E9. This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The Proposed Action has been reviewed, and none of the extraordinary circumstances described in 43 CFR 46.215 apply.

## Monitoring and Compliance

On-going compliance inspections and monitoring will be conducted by the BLM White River Field Office staff during and after construction. Specific mitigation developed in this document will be followed. The holder will be notified of compliance related issues, and depending on the nature of the issue(s), will be provided 30 days to resolve such issues.

## Administrative Remedies

This decision shall take effect immediately upon the date it is signed by the Authorized Officer and shall remain in effect while any appeal is pending unless the Interior Board of Land Appeals issues a stay (43 CFR 2801.10(b)). Any appeal of this decision must follow the procedures set forth in 43 CFR Part 4. Within 30 days of the decision, a Notice of Appeal must be filed in the office of the Authorized Officer at White River Field Office, 220 East Market St., Meeker, CO 81641 with copies sent to the Regional Solicitor, Rocky Mountain Region, 755 Parfet St., Suite 151, Lakewood, CO 80215, and to the Department of the Interior, Board of Land Appeals, 801 North Quincy St., MS300-QC, Arlington, VA, 22203. If a statement of reasons for the appeal is not included with the notice, it must be filed with the Interior Board of Land Appeals at the above address within 30 days after the Notice of Appeal is filed with the Authorized Officer.

## Signature of Authorized Official
